Dear Mom and Dad,

We are enjoying the 4th at home. Yesterday I downloaded a genealogy program from a computer bulletin board and entered some data. This is what I always needed to organize the material. Now I am inspired again and will continue to work on it as time permits. I have enclosed a sample report. There are many other options which I will explore in the future.

On Monday we mailed the TV to you via UPS. I decided to wait until you received it before I called the cable company. That way you can get the TV where you want it and they will complete all the connections.

I hope you are enjoying the holiday and I will call you soon.

Love,

Jim & Vickie
